NADIAD

## THE SCHOOL

Welcome to Euroshool. A school that sets itself apart with a unique philosophy of "Balanced Schooling". Balance between academics and co-curricular activities. Balance between theoretical and practical learning. Balance between traditional teaching methods and new-generation teaching aids. And more importantly, balance between growing up as responsible global citizen's while retaining the rich Indian ethos. Such balance, needless to add, helps students attain not just academic success, but holistic development including that of mental, physical, emotional, spiritual, cognitive and social skills.

Strategically located in a quiet, open and airy locality in Nadiad, EuroSchool stands tall as a well-appointed structure that is easily accessible by the entire district of Kheda and Anand.

Built on the motto of 'Learn... Expolre... Discover Yourself', EuroSchool strongly believes that education is not only about learning Science, Maths, History or the languages, but also about developing awareness about one's self.

Eurokid and EuroSchool, Nadiad is first pre-school & grade 12 school in Gujarat to start operation which is managed by EuroSchool Foundation Nadiad and Smartkids Education. The EuroSchool networks now spans 19 school across India.

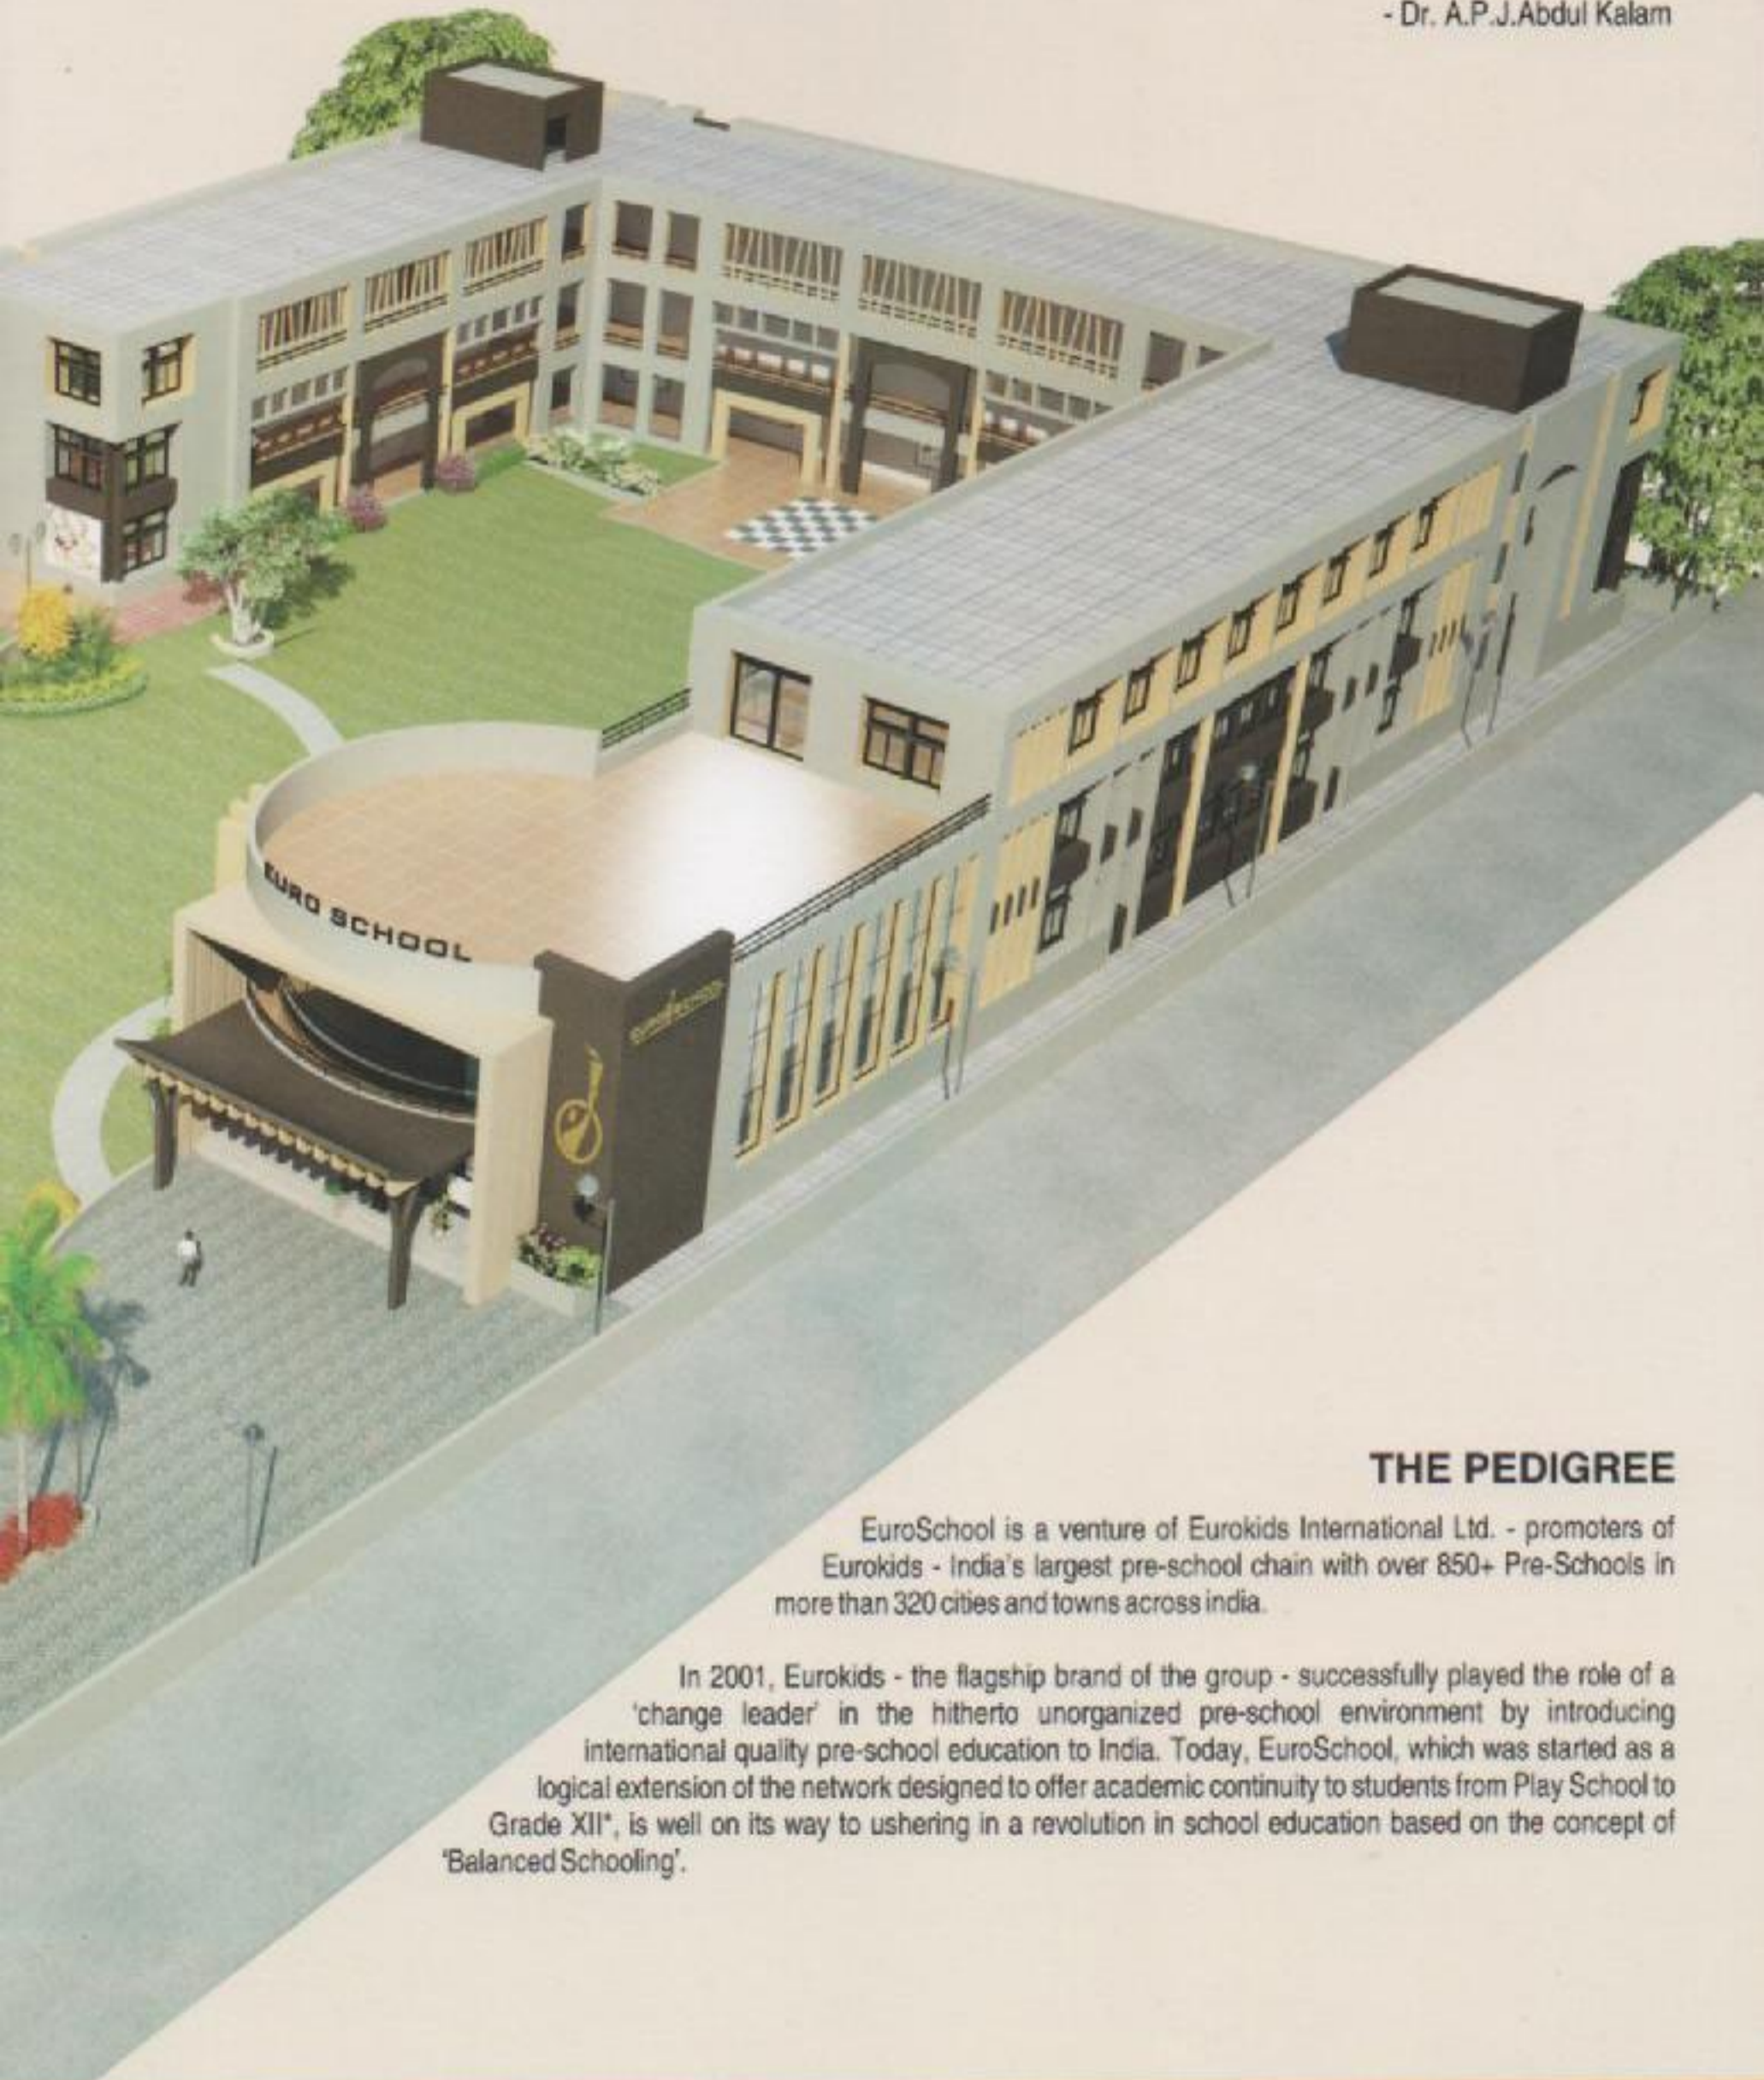

EuroSchool at Nadiad is co-educational and will enroll pupils from Play School up to Grade XII\*.

"Dream, Dream and Dream  
Dream transforms into thoughts  
Thoughts results into Action"

- Dr. A.P.J.Abdul Kalam

## THE PEDIGREE

EuroSchool is a venture of Eurokids International Ltd. - promoters of Eurokids - India's largest pre-school chain with over 850+ Pre-Schools in more than 320 cities and towns across india.

In 2001, Eurokids - the flagship brand of the group - successfully played the role of a 'change leader' in the hitherto unorganized pre-school environment by introducing international quality pre-school education to India. Today, EuroSchool, which was started as a logical extension of the network designed to offer academic continuity to students from Play School to Grade XII\*, is well on its way to ushering in a revolution in school education based on the concept of 'Balanced Schooling'.

## THE VISION

Our vision is to impart knowledge and an acute understanding of values through a voyage of self-discovery and learning.

## The Mission

- To Provide each child with a school life full of positive experiences to remember.
- To empower each child through the development of their cognitive, emotional, physical and social skills.
- To provide to parents a friendly, transparent and professional experience across the range of their interactions with us.
- To provide activities, facilities and resources encompassing the traditional and modern which will hold and develop the interest of the contemporary child and promote all-round development.
- To create young men women with a well developed personality prepared to confidently engage with the contribute to their communities at local, regional and global levels.

## The Philosophy

- Every child is a unique individual and that no two children are the same, physically or mentally.
- We need provide children with "Balanced Schooling" that achieves a balance between academics and co-curricular activities.
- We will help our students to become responsible global citizens while enabling them to retain their Indian Culture.

## THE AFFILIATION

EuroSchool, Nadiad will be affiliated to the Central Board of Secondary Education (CBSE)

## THE CURRICULUM & FACULTY

At EuroSchool, we believe that the heart and soul of any school is not building, the ground and the facilities but its course materials, its teaching methodologies and more importantly, its faculty.

The EuroSchool curriculum has been designed for exclusive use in our chain of schools by some of the most experienced academicians in the country and abroad. Drawing on their experience of teaching in Indian and overseas schools, they have developed classroom programmes that fulfil the educational needs of our children - specifically, the requirement to complete a syllabus leading to CBSE examinations - and yet is unique within India, drawing as it does, on educational practice from across the globe.

The Governing Council, comprises some of the best educationists from academia with hands - on experience and exposure to modern teaching methodologies.

Qualifications, adaptability to the changing education scenario, and the ability to impact quality education are the three most important criteria governing the selection of our academic staff. Further, intensive training programmes are conducted periodically to ensure that their skills are constantly enhanced.

## THE KEY ATTRIBUTES

### BALANCED SCHOOLING

The concept of 'Balanced Schooling'. Which is aimed at all-round development of the students, forms the very foundation of EuroSchool. At EuroSchool, we strive to achieve a balance between academics and co-curricular activities, between theoretical and practical learning, between traditional teaching methods and new-generation teaching aids, and more importantly, between growing up as responsible global citizens while retaining the rich Indian ethos.

### LRPA - A TRULY PRACTICAL APPROACH TO LEARNING

The EuroSchool learning methodology discourages rote learning completely. Instead, students are encouraged to take active part in the learning process through a unique LRPA model that makes learning stress-free, enjoyable and above all, meaningful.

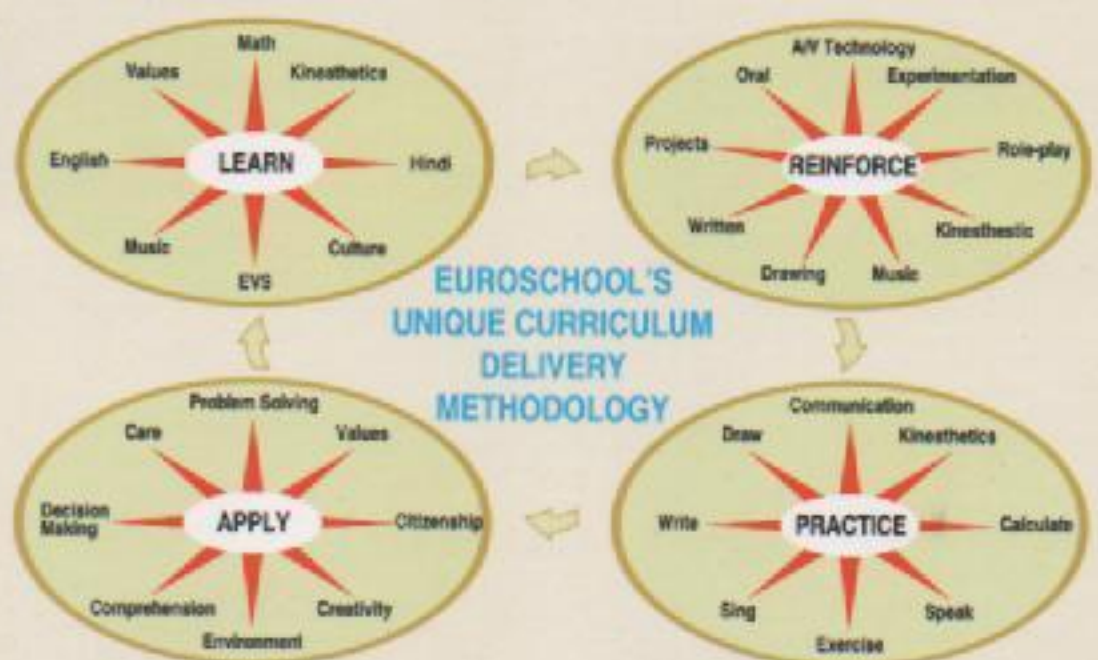

This 4-pronged approach denotes how each concept, be it mathematical, scientific or linguistic, gets ingrained into the students through:

**Learning** of the concept in the classroom,

**Reinforcement** of the concept through Audio-Visual media,

**Practice** through projects & experiments,

**Application** of the given concept in real life.

### A HEALTHY, STRESS-FREE ENVIRONMENT...

At EuroSchool, we believe that the pressure to perform puts students under undue stress. To start with, there are no formal examinations for the Pre-primary and Primary students. Further, in any given activity, students are never pitted against each other. The emphasis during the early schooling years is on acquiring multiple skills and making the schooling experience enjoyable and memorable.

A healthy, competitive environment is introduced at the middle and high school level - when students have acquired the skills to compete - with the aim of preparing them for the day when they step out of the school, equipped to face the competitive world outside.

## TECHNOLOGY - LED APPROACH TO LEARNING

EuroSchool's forward-thinking approach to learning reflects in its modern facilities that include state-of-the-art computer lab, a unique smart class system, fully equipped science labs and a web portal for students & parents, in addition to a host of new generation teaching aids.

## A HEALTHY MIX OF CO-CURRICULAR ACTIVITIES

EuroSchool boasts of a large multi-sport playground with professional coaching in Cricket\*, Tennis\*, Football, and Basketball\*. We have facilities for indoor games like Chess, Carrom, Table Tennis & Scrabble. Besides, students are encouraged to participate in co-curricular activities like Art, Singing, Dancing, Dramatics, Taekwondo, Gymnastics and Skating.

Specialized, well-equipped Computer Lab, Science Lab, Language Lab & Math Lab in keeping with our motto of 'Learn... Explore... Discover Yourself'.

A separate Electronics and Robotics Lab\*, where students from Grade V and above will undergo a course in Artificial Intelligence - the branch of Computer Science dealing with the practical use of robots through advanced computer programmes.

## INTER HOUSE SYSTEM

The House system at EuroSchool aims to break the large community of students in a particular school into smaller more personal units thereby building a sense of unity and competition amongst the house members.

At EuroSchool, we follow a house system based on Greek gods with specific mottos.

## SCHOOL SUPPLIES STORE

This is a one-stop-shop where you will get all books and stationery your child will require.

## FINAL DESTINATION

EuroSchool believes that every child is different and unique in his or her learning ability and interests. The school strives to stimulate and develop every child's abilities to his or her highest potential.

Getting them ready to face and make a difference to the world outside the school is the core of our every action on the campus. At EuroSchool-Nadiad, the final objective of our existence is building confident and matured citizens of this country and more importantly, one world... the "Global Citizens" in true spirit.
